

Seed pot making instructions:

1. From a sheet of newspaper, cut strips 90mm wide x 400mm long. Do not use the glossy newspaper inserts.
2. Tightly roll one strip of paper onto the mandrel, keeping it even with the top of the bottom section of the mandrel. Roll on the entire 400mm length of the strip.
3. While holding the rolled on paper in place with one hand, fold over the end of the newspaper under the mandrel. Fold in the loose end first to prevent the end from unraveling.
4. Place the covered mandrel into the socket, press down hard and twist.
5. Slide the finished pot off the mandrel and it is ready for use.
6. Fill the pot with good potting mix, and sow the seed. When the time comes to plant the seedling, plant it out newspaper pot included.
